OFFICIAL SUPPLIER  
SCUDERIA FERRARI

In addition to SKF's renewed research and development facilities in Europe and the United States, Formula One car racing provides a unique environment for SKF to push the limits of the complex and fully diversified bearing related technology. A Scuderia Ferrari single-seat car utilizes more than 150 SKF components. Lessons learned here are applied to the product we provide to automakers and the aftermarket worldwide.

# The Power of Knowledge Engineering

From the company that invented the self-aligning ball bearing more than 100 years ago, SKF has evolved into a knowledge engineering company that is able to draw on five technology platforms to create unique solutions for its customers. These platforms include bearings, bearing units and seals, of course, but extend to other areas including: lubricants and lubrication systems, critical for long bearing life in many applications; mechatronics that combine mechanical and electronics knowledge into systems for more effective linear motion and sensorized solutions; and a full range of services, from design and logistics support to conditioning monitoring and reliability systems.

Though the scope has broadened, SKF continues to maintain the world's leadership in the design, manufacture and marketing of rolling bearings, as well as complementary products such as radial seals. SKF also holds an increasingly important position in the market for linear motion products, high-precision aerospace bearings, machine tool spindles and plant maintenance services.

The SKF Group is globally certified to ISO 14001, the international standard for environmental management, as well as OHSAS 18001, the health and safety management standard. Individual divisions have been approved for quality certification in accordance with ISO 9001 and other customer specific requirements.

With over 120 manufacturing sites worldwide and sales companies in 70 countries, SKF is a truly international corporation. In addition, our distributors and dealers in some 15 000 locations around the world, an e-business marketplace and a global distribution system put SKF close to customers for the supply of both products and services. In essence, SKF solutions are available wherever and whenever customers need them. Overall, the SKF brand and the corporation are stronger than ever. As the knowledge engineering company, we stand ready to serve you with world-class product competencies, intellectual resources, and the vision to help you succeed.

## The quick and easy way to access our online parts catalogue.

Now you can take advantage of our new automotive parts catalogue application for the iPhone. It gives you instant access to the very latest product information and technical data. Not to mention product images and engine diagrams. You can search using various parameters such as car model, kit designation and OE number. What's more, it's free.

Simply download the "SKF Automotive parts search" app from the Apple iTunes App store.
